## 1. Course Overview

Course: APMG International Project Planning & Control™ Practitioner.

Level: Practitioner

Individuals undertaking this training will gain an understanding of effective planning & control standards and best practices; learn how to implement effective planning, monitoring & control for increased chances of project success to improve the return on investment. This training package includes APMG International's Project Planning & Control™ (PPC) practitioner Course.

Project Planning & Control guidance and training:

- Offers a step-by-step control guide from project initiation to execution.
- Provides a holistic overview of the interdependencies between planning and control functions.
- Is a practical and scalable companion to any project control professional.
- Enables effective capability growth for delivery organisations.

## 2. Eligibility requirements:

Project Planning & Control™ (PPC) Practitioner - Project Planning & Control™ (PPC) Foundation qualification is a pre-requisite for the practitioner qualification.

## 3. Learning Outcomes

By the end of this course you will be able to understand:

- a. The approaches and key products used to gain a clear definition of a project.
- b. The approaches and techniques used to plan and close a project.
- c. The scheduling techniques and appropriate presentation of the outputs.
- d. The management of risk in the planning, execution and evaluation of a project.
- e. The practices and data used for rigorous monitoring to enable proactive control of the project.

## 4. Pre Course Requirements

Read the APM's guide, 'Planning, Scheduling, Monitoring and Control – The Practical Project Management of Time, Cost and Risk.' that provides advice'.
